1939 Annual Catalog

WE WANT OUR CATALOG to be a friendly medium of contact and amicable business relations. We have endeavored to give cultural directions in conjunction with the various varieties wherever possible.

When we advertise "Pure and Sure Seeds" we mean that our customers receive seeds which have been tested under varying conditions prior to sale; thus reducing to a minimum the possibility of failure.

Serving the Market Gardener, Farmer and Amateur for years, we have always kept before us the importance of "Pure and Sure Seeds" of the highest quality.

That we have succeeded in our efforts to furnish seeds of this High Quality during the years we have been in business is shown by the very gratifying increase which our business has shown year by year. We have been favored, too, with remarkably loyal support on the part of our customers, many of whom started to trade with us years ago and are with us yet. To old and new customers alike we are sincerely grateful.

THE PRICES QUOTED IN THIS CATALOG ARE NET. We reserve the right to advance prices without notice should current conditions require it.

PLEASE NOTE—ABOUT WARRANTING SEEDS

NON-WARRANTY. Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather or soil conditions, too deep or too shallow planting, etc., which renders it impossible for us to guarantee success, and although we take all possible care to supply only such goods as will, under proper conditions, produce satisfactory results, we still give no warranty as to description, quality or productiveness of any of the seeds, plants or bulbs we send out, and will not be in any way responsible for the crop, and every order for articles named in this Catalog will be executed on these conditions only. It must, however, be plain to everyone who gives the matter the slightest thought that it is to our best interests to send out only such stock as will not only grow, but prove true to name and description.

PERENNIALS

Perennial seed may be planted in fall, but on account of the hot, dry fall season in St. Louis locality, we advise sowing perennials in early May, except those marked FALL, which are slow and will not germinate until the following spring. Perennials marked (*) will bloom the first year from seed if sown early.

DU BAY SEMESAN
It destroys the destructive diseases on the seed and protects them from the rots in the soil, which results in increased stands of more vigorous, healthy plants that yield larger, quality crops. Sprinkling of the seedling beds with Semesan solution effectively prevents damping-off. Recommended especially for seeds, bulbs, and gladiolus corms.

Semesan (for Vegetables and Flowers). 2 ozs., 35c; 1 lb., \$2.25; 5 lbs., \$9.90; 25 lbs., \$45.50.
Semesan, Jr. (for Corn). 4 ozs., 30c; 1lb., 75c; 5 lbs., \$3.25.
2 ounces treat one bushel of seed corn, as a dust.
Semesan Bel (for Seed Potatoes, Bulbs, and Roots). 4 ozs., 45c; 1 lb., \$1.50; 5 lbs., \$6.75; 25 lbs., \$31.00.
1 pound treats 60 to 80 bushels of seed potatoes.
Ceresan (for Wheat, Oats, Barley, Rye, and Cotton). 1-lb. tin, 70c; 5-lb. tin, \$3.00.
2 to 3 ounces treat a bushel of seed, as a dust.

ANSUL DUST

Ansul Dust mixed with the soil controls seed borne diseases and damping off of almost all types of vegetables and flowers; also cutting and transplanting. It is safe, economical and easy to apply. Gives complete soil sterilization. Seed treatment is unnecessary. Ansul Dust controls oat smut and covered smut of barley without injury to seed. Full directions for use with each package. 1 lb., 75c; 5 lbs., \$2.00; 25-lb. drum, \$5.50; 50-lb. drum, \$9.00.

The flavor is distinct. It combines the qualities of both celery and cabbage and is highly prized as a salad vegetable. Plant seed out-of-doors at the

Broccoli

"P. H." World's Greatest Animal Conditioner and Worm Expeller. Given to the Animal With Its Food

Seventy per cent of all your live stock losses are caused by worms. Get rid of these profit-eating, blood sucking pests—they keep your animals in a run-down, runty, unthrifty condition. Worms sap their strength, spoil their digestion and make them easy prey to dangerous diseases.

"P. H." is used by the largest dog kennels in this country and abroad. Show dogs are conditioned with "P. H." and are kept in the pink of condition at all times by regular use of "P. H.". Owners of racing greyhounds have found "P. H." a wonderful conditioner and wormer for these dogs that must be in top condition to win.

"P. H." is economical to use, as you will save more than the slight cost of "P. H." in food, as your animal will get the full benefit of its food, thus effecting a suffi-

cient saving in the feed bill to more than pay for the "P. H." used. "P. H." is a positive necessity to every large kennel.

"P. H." is the cheapest form of health insurance that you can secure.

HORMONE TREATED

HAVALAWN is the city's finest and best known grass seed. It is a mixture prepared by experts. Only the finest seeds are used, and only varieties specially selected for best results in the St. Louis climate.

Cheap grass seed never pays. It always costs more in the end. It is full of chaff and dormant seeds that will never grow. HAVALLAWN seed is double cleaned and exceptionally high in germination.

St. Louis Seed Company has kept its position of leadership by being never satisfied; by always seeking progress. So now the finest grass seed is even better than ever before.

Hormone treatment has a proven record of improving fertility, root growth and plant

growth—often as much as fifty per cent. But heretofore physical conditions made the Hormone treatment of grass seed impossible. Constant research and a revolutionary improvement has at last overcome what looked like an impossibility. At last grass seed has been successfully Hormone treated.

HAVALAWN, always first in quality is now first in being Hormone treated. The best seed made even better. And because of that betterment actually lower in cost of results than ever before. HAVALLAWN Hormone treated seed does not cost any extra. Remember that in results HAVALLAWN will go more than twice as far as so called cheap seed. Beautifying Your Lawn

This year because of Hormone treated HAVALAWN grass seed you have a golden opportunity to beautify your lawn with a luxurious carpet of green velvet. But remember that proper preparation, care and feeding are still necessary.

Proper fertilization of the lawn is always vital—and with the use of Hormone treated grass seed it is even more necessary than ever before. Hormones are not plant food, but the mysterious element of nature that enables the plant to take fullest advantage of the food in the soil.

Grass consumes the nourishment in the soil; so for a successful lawn the plant food must be replenished annually with fertilizer. We recommend Vigoro; the fertilizer containing the eleven different elements needed for plant food. We will gladly give you expert advice in the proper preparation of the lawn for seeding and the use of fertilizer.

HORMONES

are Nature's Magic

Hormones are to vegetation what vitamins are to humans. The mysterious element that controls growth. Without Hormones vegetation has a struggle for very existence. With Hormones vegetation starts surer and quicker and root and top growth develop with marvelous improvement.

Years of scientific research have not only determined the purpose of Hormones but has made possible the isolation of them—so that this magic can actually be applied in a practical way—and practical results have duplicated laboratory results in their records of miraculous growth improvement.

The latest development in the science of plant health is the application of Hormones to grass seed—properly given to St. Louis through the Middle West's oldest and greatest seed house.

Startlingly New Advancement

**Makes possible
the Hormone
treatment of
Grass Seed**

Science has known for years that the Hormone treatment of seeds, roots and cuttings work a wonderful improvement. Results have been amazing. Root growth and plant growth have often doubled.

Roots, cuttings and bulbs have been so treated for years—but the very smallness of grass seed baffled science. At last a startlingly new advancement, an entirely different method of application, has been developed.

This Spring we are proud to announce that HAVALAWN grass seed is Hormone treated.
